# Pathologic Anatomy

## Syllabus

Department **Pathophysiology and general pathology**

Curriculum s310501- ЛечДелоИн -23-3plx  
Specialty 31.05.01 General Medicine

Qualification **General Practitioner**

Form of education **Full-time**

Total (in credits) **7**

Total academic hours	252	Control:
including:		Exam, 6 <sup>th</sup> term
Classes	160	
Self-study	65	
Control:	27	

### Course outline in terms

Academic year (Term)	5 (3.1)		6 (3.2)		Total	
	Weeks		17 2/6			
Types of classes	Cur	Syl	Cur	Syl	Cur	Syl
Lectures	16	16	16	16	32	32
Practical	64	64	64	64	128	128
Total aud.	80	80	80	80	160	160
Contact	80	80	80	80	160	160
Self-study	28	28	37	37	65	65
Control			27	27	27	27
Total	108	108	144	144	252	252

The Syllabus is compiled by:

The Syllabus  
Pathological anatomy

Developed in accordance with Federal State Educational Standard:  
Federal State Educational Standard of higher education in the specialty 31.05.01 General medicine (Order of the Ministry of Education and Science of the Russian Federation on 12.08.2020 r. № 988)

Based on the Curriculum:  
31.05.01 GENERAL MEDICINE  
Specialization: General Medicine  
Approved by the Academic Council of Surgut State University, 15.06.2023 Record № 5..

The Syllabus was approved by the department  
Pathophysiology and general pathology

Head of the Department, Doctor of Medical Sciences, Professor Kovalenko L.V.

**1. COURSE OBJECTIVES**

- 1.1 Obtaining systematic knowledge about the causes, patho- and morphogenesis, clinical manifestations, outcomes and complications of the most important pathological processes and human diseases; skills of clinical and morphological comparisons and the basics of general pathological (clinical) thinking - the ability to analyze various (clinical and anamnestic, laboratory, functional, morphological, etc.) data about a process or a patient with the formation of a holistic vision of human pathology, understanding the importance of pathogenetic therapy and the basics of its tactics.

**2. COURSE OVERVIEW**

Course code (in curriculum): B1.O.04

**2.1 Assumed background:**

- 2.1.1 Foreign language in the professional field (Russian language)  
2.1.2 Propaedeutics of internal diseases  
2.1.3 Foreign language (Russian)  
2.1.4 Biochemistry  
2.1.5 human anatomy  
2.1.6 normal physiology  
2.1.7 Philosophy  
2.1.8 Biology  
2.1.9 History of medicine  
2.1.10 Introduction to professional activity. Ethics and deontology (bioethics)  
2.1.11 Latin language  
2.1.12 Physics mathematics  
2.1.13 Chemistry  
2.1.14 Histology, embryology, cytology

**2.2 Post-requisite courses and practice:**

- 2.2.1 Industrial practice for obtaining professional skills and experience of professional activity in the positions of paramedical personnel  
2.2.2 Industrial practice of a diagnostic profile  
2.2.3 Topographic anatomy, operative surgery  
2.2.4 Pathophysiology  
2.2.5 Pharmacology  
2.2.6 Immunology and Allergology  
2.2.7 infectious diseases  
2.2.8 Radiation diagnostics  
2.2.9 Neurology, medical genetics, neurosurgery  
2.2.10 Otorhinolaryngology  
2.2.11 Propaedeutics of internal diseases  
2.2.12 Gynecology  
2.2.13 general surgery  
2.2.14 Urology  
2.2.15 Clinical pathological physiology  
2.2.16 Pathological syndromes in clinical medicine  
2.2.17 Preparation for passing and passing the state exam  
2.2.18 Oncogynecology  
2.2.19 Emergency Medicine  
2.2.20 Phthisiology  
2.2.21 Pediatrics  
2.2.22 Clinical pharmacology  
2.2.23 medical rehabilitation  
2.2.24 Dermatovenereology  
2.2.25 Anesthesiology, resuscitation, intensive care  
2.2.26 Traumatology and Orthopedics  
2.2.27 Oncology, radiation therapy

2.2.28	Ophthalmology
2.2.29	Forensic Medicine
2.2.30	Occupational diseases
2.2.31	Faculty Therapy
2.2.32	Hospital therapy (5 course)
2.2.33	Endocrinology
2.2.34	Hospital therapy (6 course)
2.2.35	Obstetrics
2.2.36	Industrial practice of a therapeutic profile
2.2.37	Faculty Surgery
2.2.38	Hospital surgery. Pediatric surgery
2.2.39	Hospital surgery
2.2.40	Industrial practice of a surgical profile
2.2.41	Industrial practice of obstetrics and gynecology
2.2.42	Industrial practice in emergency medical manipulations using simulation technologies
2.2.43	Cardiovascular surgery and functional diagnostics
2.2.44	Perinatology
2.2.45	Clinical pathological anatomy

### 3. COMPETENCES UPON COMPLETION OF THE COURSE (MODULE)

GPC -5.6. Demonstrates knowledge and skills to identify: the structure of the human body, morphological macro - and microscopic parameters in pathology; diagnose criteria of general pathological pathophysiological processes in various nosologies; on the basis of which he has the skills to the full topographic anatomy and is able to solve issues of operative surgery

GPC -5.8. Demonstrates an understanding of the mechanisms of development of general pathological processes, knowledge of the pathogenesis of various diseases and pathological conditions of a person, the ability to identify the leading links pathogenesis in their relationship with a specific disease or pathological condition and on this basis ability to justify effective pharmacotherapy

GPC -5.9. Demonstrates knowledge of the theoretical foundations of immunology, allergology, understanding of immune defense mechanisms, types of immunological reactions and their role in the pathogenesis of human diseases

**By the end of the course students must:**

<b>3.1</b>	<b>Know:</b>
3.1.1	basic methods of pathoanatomical research;
3.1.2	essence, patterns of development and clinical significance of the most important morphofunctional, physiological conditions and pathological processes in the human body;
3.1.3	the doctrine of the disease, nosology, the principles of classification of diseases, the basic concepts of general nosology;
3.1.4	structural and functional foundations of diseases and pathological processes, causes, basic mechanisms of development and outcomes of pathological processes, dysfunctions of organs and systems;
3.1.5	characteristic changes in internal organs in the most important human diseases;
3.1.6	terms used in the course of pathological anatomy;
3.1.7	the main methods of laboratory, instrumental, pathoanatomical and other studies in order to recognize the condition or establish the fact of the presence or absence of a disease;
3.1.8	the essence and basic patterns of general pathological processes;
3.1.9	the concepts of etiology, pathogenesis, morphogenesis, pathomorphosis, the basics of the doctrine of nosology, the principles of classification of diseases;
3.1.10	structural and functional foundations of diseases and pathological processes, causes, basic mechanisms of development and outcomes of typical pathological processes, dysfunctions of organs and systems;
3.1.11	characteristic changes in internal organs in the most important human diseases;
3.1.12	the basis of pathology that develops under the influence of environmental factors.
<b>3.2</b>	<b>Be able to:</b>
3.2.1	3.2.1 use educational, scientific, popular science literature, the Internet to master the training program;

3.2.2	collect and analyze the patient's complaints, his medical history data; evaluate the results of the examination, laboratory, instrumental, pathoanatomical and other studies in order to recognize the condition or establish the presence or absence of the disease;
3.2.3	work with magnifying equipment when conducting a microscopic examination of a histological preparation and give its morphological description;
3.2.4	on the basis of the descriptions received, to express an opinion on the nature of the pathological process and its clinical manifestations, the presumptive diagnosis or cause of death when solving situational problems, to formulate a pathoanatomical diagnosis;
3.2.5	evaluate morphofunctional, physiological states and pathological processes in the human body and substantiate the nature of the process and its manifestations.
<b>3.3</b>	<b>Have skills of:</b>
3.3.1	terms used in the course of pathological anatomy;
3.3.2	basic information transformation technologies: text, spreadsheet editors, Internet search;
3.3.3	skills of microscopy and analysis of histological preparations and electron micrographs;
3.3.4	skills in evaluating the results of post-mortem examinations in order to recognize a condition or establish the fact of the presence or absence of a disease;
3.3.5	the skill of comparing the morphological and clinical manifestations of diseases;
3.3.6	the skill of formulating a conclusion (diagnosis) in solving situational problems, evaluating results. histological study.

4. STRUCTURE AND CONTENTS OF THE COURSE (MODULE)						
Class Code	Topics /Class type	Term / Academic	Academic hours	Competences	Literature	Interactive
	<b>Section 1. General pathological anatomy</b>					
1.1	Methodical foundations of pathological anatomy. Reversible and irreversible damage to cells and tissues. Cell tropism, mechanisms for providing and disrupting cell tropism. Dystrophy. Causes, mechanisms of development, features of morphological manifestations, clinical significance. Irreversible damage to cells and tissues. Necrosis, apoptosis. Causes, mechanisms of development, differences, clinical significance. /Lec/	5	2	GPC -5.6 GPC -5.8 GPC -5.9 GPC -5.10	L1.1 L1.2L2.1 E1 E2 E3 E4

## 5. ASSESSMENT TOOLS

### 5.1. Assessment tools for midterm assessment

Presented by a single document

### 5.2. Assessment tools for diagnostic testing

Presented by a single document

## 6. COURSE (MODULE) RESOURCES

### 6.1. Recommended Literature

#### 6.1.1. Core

	Authors	Title	Publisher, year	Quantity
Л1.1	Cyplakov D. É., Šakirova A.Z., Silina E.V.	Macro- and Microscopic Diagnosis in Practical Classes in Pathological Anatomy: atlas	Moscow: GEOTAR -Media, 2023	1
Л1.2		Pathological Anatomy : textbook:	Moscow: GEOTAR -Media, 2022, electronic resource	2

#### 6.1.2. Supplementary

	Authors	Title	Publisher, year	Quantity
Л2.1	Tsyplakov , Shakirova , Silina	Macro- and microscopic diagnosis in practical classes in pathological anatomy. Atlas: study guide	Moscow: GEOTAR -Media, 2023, electronic resource	2

### 6.2. Internet resources

- Э1 pathological anatomy <http://www.mediasphera.ru/journals/arh.pat/about/>
- Э2 pathological anatomy <http://www.freemedicaljournals.com>
- Э3 pathological anatomy <http://www.mcponline.org>
- Э4 pathological anatomy <http://patolog.ru/>

#### 6.3.1 Software list

#### 6.3.2 List of information reference systems

## 7. MATERIAL AND TECHNICAL SUPPORT OF DISCIPLINE (MODULE)

7.1	Classrooms for conducting lecture-type classes, seminar-type classes (practical classes), group and individual consultations, current control and intermediate certification are equipped with: standard educational furniture; technical teaching aids used to present educational information - an interactive pathology class "Virchow", microscopes; posters, micro- and macropreparations, dummies.
